

L1XF Integrated Lighting Module

GALLET F1XF Fire Helmet Accessories

The GALLET F1XF integrated lighting module has been truly lighting the way of firefighters on every fireground. The new evolution – the L1XF – has been improved with the following main features:

- ✓ New boost mode in addition to standard mode
- ✓ Increased lighting output (120 lumens)
- ✓ Improved shape of ON/OFF button

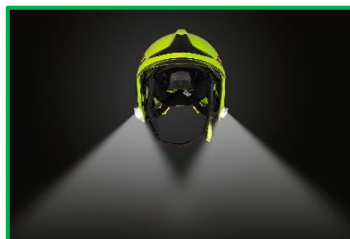

Key Features and Benefits

✓ Perfect integration into the GALLET F1XF helmet

- 1 LED on each side, fully integrated inside the helmet to avoid snagging hazards
- 360° well-balanced module and down gravity centre
- Lightweight, compact and discrete
- Better comfort compared to other lighting modules on the market

✓ Unmatched lighting experience

- Powerful and diffused lighting using latest LED technology
- Avoids unnecessary movements of the firefighter's head by naturally lighting the environment
- Beam orientation prevents blinding fellow firefighters or casualties on the scene

✓ Streamlined dual beam for all operations

- Standard mode (25 lumens)
- Boost mode (120 lumens)

✓ Long reserve mode

- Clear indicators for low battery to improve firefighters' safety

✓ Intuitive ON/OFF switch button

- Facilitates beam selection, even with gloves
