

# PremAire® Combination

Combination Airline Escape Respirator

Put on belt and holster assembly.

Put on shoulder harness with cylinder demand valve airline assembly.

Attach cylinder to holster assembly and adjust shoulder strap.

Put on facepiece, adjust harness straps and test facepiece tightness.

Check gauge to ensure fully pressurized cylinder. Pull on airline hose, remove protection cap and connect pigtail to airline.\*

Attach demand valve to facepiece and inhale once forcefully.

\* Only for PremAire Combination, equipped with an Automatic Switch Valve approved to EN 169-3-1. Connections to airline also possible for PremAire Combination approved to EN 4-02 only do this once as an emergency air source.
