

A woman with curly hair, wearing a dark jacket and jeans, is operating a yellow Spencer Evacuation Chair on a staircase. The chair is designed with a yellow frame, black wheels, and a black seat. It has a handrail and a footrest. The woman is standing behind the chair, holding the handrail. The background shows a modern building with large windows and a glass railing.

# NOBODY LEFT BEHIND

Emergencies in buildings and workplaces can happen at any time.

In situations like fires, earthquakes, explosions or something as simple as a power cut, lifts are put immediately out of service and the evacuation of injured people or those with mobility limitations can be extremely challenging.

Fire

Explosion

Industrial  
Accidents

Toxic  
Substance

Natural  
Disasters

Black-out

Building  
Collapse

When these unpredictable events occur, our duty is to be prepared to effectively manage and control the after-effects and protect the safety of our staff, visitors and customers, **leaving nobody behind.**

A simple investment in evacuation stair chairs can really make a difference for the safety and inclusivity of your facility.

**We at Spencer have developed an advanced range of stair chairs – the SKID – that can streamline the evacuation process, ensuring efficient and smooth evacuation for everyone.**

As a facility manager, enabling the safety of your premises brings you peace of mind, knowing that you have undertaken all necessary steps to protect the well-being of all your employees, visitors and customers.

# DELIVERING SAFETY

## SMOOTH & SAFE EVACUATION

In emergency situations, the availability of high-quality evacuation equipment is essential to transport people with injuries or mobility limitations out of harm's way quickly, safely and smoothly.

## CERTIFIED EQUIPMENT

The evacuation chairs we provide are built in our facilities in Italy and are all classified as medical device. As such, they are certified in MDR and constantly tested to deliver superior performances.

## PROTECTING PEOPLE

The solutions we offer are designed to provide the best protection of the patient, whilst ensuring operators are safe from lifting and handling injuries when using our devices.

### MDR

Regulation (EU) 2017/745

### Testing

Dedicated Crash Test

### Quality Management System

EN ISO 9001:2015  
EN ISO 13485:2016 + A11:2021

### Product surveillance

# EMPOWERING MOBILITY

For over 30 years we at Spencer have built equipment that helps caregivers and paramedics to carry out emergency and rescue operations in complete control, guaranteeing the full protection of both the patient and the operator.

From our headquarters in Italy, we design medical and evacuation equipment that provide high standards of usability, resistance and reliability in decisive moments.

## WHAT THEY SAY ABOUT US?

### J. Tinkler

Credit Controller, Plimsoll  
Publishing Ltd

"Last year I was evacuated from my office on the third floor with the PRO-SKID chair. I could not believe how quickly and smoothly my colleague Peter managed to carry me to the ground floor and leave the building. I feel very reassured to know this device is always at hand for me in case of emergency."

### R. Ksiazkiewicz

Rephamed, Sales Rep, Poland

"Unlike the stair chairs other providers supply, every time I demonstrate the use of the SKID on staircases with my customers sitting on it, my back never suffers."

### A. Menaroni

Resp. Sicurezza, Poste Italiane

"What's impressive about the SKID is the size of the wheels, which help the chair to move effortlessly all the way across our corridors and courtyards to the designated evacuation assembly point."

# EVACUATION CHAIRS

PRO SKID-E

SKID-OK

SKID-E

For people with mobility limitations or with injuries, the **Spencer SKID stair chairs** are the best guarantee for a **quick and smooth stairway descent** during an emergency in multi-storey building.

Fitted with tracks to facilitate movement going downstairs, they offer operators greater **control** and **stability** in decisive moments.

## WHY

The availability of SKID evacuation chairs in your facilities helps you to create a safer environment for all occupants, as it increases your emergency preparedness, provides equal opportunities to those with reduced mobility and brings you peace of mind - knowing that you have undertaken all necessary steps to protect the safety of your employees, visitors and customers.

## WHAT

The Spencer SKID chairs are lightweight and robust foldable stair chairs that help to evacuate the mobility impaired down stairs in a controlled and safe way. The PRO SKID-E chair can be lifted to overcome obstacles and carry patients upstairs.

## WHEN

During an emergency in multi storey buildings, when lifts are unavailable or too tight for stretcher trolleys, the Spencer SKID chairs can be deployed in a matter of few seconds and help to evacuate people with mobility limitations down stairs.

## WHERE

The Spencer SKID chairs are always folded in proximity to staircases. They can be used for stairway descent or to evacuate the mobility impaired across flat surfaces to the designated assembly point.

## WHO

These devices are a must-have equipment for facility and security managers, as they ensure member of staff, visitors or customers with mobility limitations (or injured) can be safely evacuated from multi storey buildings in case of emergency.

# PRO SKID-E

EVACUATION AND TRANSPORT CHAIR

Lightweight and robust at the same time, PRO SKID-E features a pair of telescopic front and rear handles, making it suitable for both stairway ascent and descent.

ACCESSORIES

<b>RIST136A</b>	Restraint belts with plastic buckle <b>[INCLUDED]</b>
<b>SK14000B</b>	Skid/Pro Skid wall mounting bracket
<b>SK21002E</b>	Skid protection cover
<b>SK21000E</b>	Skid dust protection bag
<b>SK13018B</b>	Ankles restraint belts

RIST136

SK14000B

SK21002E

SK21000E

IDEAL FOR A SMOOTH AND CONTROLLED STAIRWAY DESCENT, PRO SKID-E CAN BE LIFTED TO GO UPSTAIRS OR OVERCOME AN OBSTACLE.

## MAIN FEATURES

Clear graphic instructions are available on the back of the headrest.

EASY TO CLEAN

EASY TO STORE

Ergonomic extendable handle improves grip during stairway descent.

Adjustable headrest is fitted with head restraint strap.

Frame in aluminium reduces the overall weight of the chair and increases its resistance.

Supplied with 2 polypropylene 50 mm restraint straps.

Adjustable reinforced seat in PVC confers better comfort and is easy to wash

2 front pull-out handles make the chair suitable for transport upstairs.

Footrest provides greater stability and improves patient's blood circulation.

Rear handles allow the chair to be lifted.

Reinforced tracks offer increased control and smooth movement going down stairs.

Rear wheels Ø20 cm reduce friction and make it easier to move patients across a flat surface.

Fitted with pivoting front wheels (Ø10 cm) with brake.

# SKID-OK

## LIGHTWEIGHT EVACUATION CHAIR

SKID-OK is a compact stair chair with an overall weight of just 10 kg. Its lightweight structure makes it particularly maneuverable in tight spaces or when staircases are too narrow and yet SKID-OK can carry up to 250 kg.

Models	SKID-OK	SKID-OK (B)
Codes	SK20003E	SK20002E
