

# FARMA ISO 10

## Type

Refined white oil of medical quality ISO-VG 10.

## Area of application

Can be used for manufacturing of cosmetics and medical products. both as a process oil as well as a lubricant for machines. The product is also well suited for other purposes where an oil of medical quality is a demand. Other application areas may be as a softener and process oil within the chemical technical industry.

## Specifications

FDA 21 CFR 172.878, 178.3570 and 178.3620(a), USDA H1 approved.

Further approvals may be required on demand.

Do not contain any reactive components or chemical additives.

## PROPERTIES

- Water clear, smell free medical white oil. It is a clean highly refined paraffinated mineral oil that meets the medical demand of cleaning.
