BlueStar PLUS

DESCRIPTION

High Protection with Maximum Comfort

This white protective coverall made of PP (65 g/m²) with microporous film (MF) lamination and taped seams is designed for demanding tasks where safety and comfort are essential. The suit is antistatic, breathable, and low-linting, reducing the risk of contaminating the work environment. It features a three-piece hood, zipper up to the chin, storm flap with adhesive tape, and elastic at wrists, ankles, waist, and thumb for a secure fit. An additional gusset in the crotch ensures excellent freedom of movement. The coverall provides an effective barrier against pressurized liquid sprays, a wide range of chemicals, blood, body fluids, and infectious agents – all without compromising comfort.

Print and color may vary.
