HERWESAN ACQUA

Skin protection cream for water-based working materials

Description:	<i>HERWESAN ACQUA</i> is a white, water-resistant O/W protective skin cream with a high fat content. <i>HERWESAN ACQUA</i> is silicone-free.
Composition (INCI):	AQUA, PETROLATUM, PARAFFINUM LIQUIDUM, GLYCERIN, CETEARYL ISONONANOATE, OZOKERITE, HYDROGENATED CASTOR OIL, GLYCERYL ISOSTEARATE, POLYGLYCERYL-3-OLEATE, MAGNESIUM SULFATE, PARFUM, PHENOXYETHANOL, METHYLPARABEN, ETHYL-PARABEN, BUTYLPARABEN, PROPYLPARABEN, ISOBUTYLPARABEN.
Properties:	<i>HERWESAN ACQUA</i> is a skin protection cream specially developed for the contact with water-based substances. The protection cream is high adherence and covers the skin very well. Because of the high fat content and the hydrophobic structure of <i>HERWESAN ACQUA</i> , water-soluble substances can't contact the skin easily.
Fields of application:	<i>HERWESAN ACQUA</i> is particularly suitable when dealing with diluted acids and lyes, waterbased cooling lubricants, disinfectants, salines, alcohols, detergents, cement and lime.
Use:	Apply <i>HERWESAN ACQUA</i> before work and after washing and drying your hands. Rub in thoroughly, also between fingers and on nails. <i>HERWESAN ACQUA</i> can also be applied to the face.
Regulatory framework:	<i>HERWESAN ACQUA</i> is subject to the Cosmetics Ordinance and corresponds to it in its current version. It does not have to be labelled according to the German Hazardous Substances Ordinance.
Storage and shelf life:	<i>HERWESAN ACQUA</i> can be kept for at least 30 months in the unopened original packaging (from date of manufacture). The date of manufacture is denoted on the packaging.
Packaging sizes:	100 ml tube and 2000 ml pouch bottle. Dispensing-system: Herwemat Uni 2000 dispenser.
Disposal:	The cardboard boxes, tubes and plastic packaging are recyclable.
